Job Application for Senior Fullstack Engineer (Rails/React)

Dear Hiring Team,

This letter is to express my interest in your posting for Job Application for Senior Fullstack Engineer (Rails/React). With a Bachelor's degree in Computer Science and hands-on experience using REST APIs with Django, JavaScript (ES6+), React, Redux and TypeScript, to create and implement web applications, I am confident that I would be a valuable addition to your team.

At Arbisoft, for the most time I worked on the development of an Application Tracking System which manages the recruiting and hiring process, including job postings and job applications, as a lead front-end developer. I've also worked on Arbisoft's In-house ERP (Enterprise Resource Planning) that empowers the organization by automating many HR and accounts functions. I also successfully collaborate on solutions with our product, QA, marketing teams and clients to offer the best user experience and to provide customers with more value.

Your listed requirements closely match my background and skills. A few I would like to highlight that would enable me to contribute to your bottom line are:

- 4 years of full-time experience with Javascript, Typescript, and React
- 4 years experience with Python and Django
- Testing experience with Jasmine and Django Tests
- Experience in mentoring junior colleagues
- Excellent spoken and written English communication

I've attached a copy of my resume detailing my experience. I would enjoy an opportunity to chat about your upcoming plans and share with you how my achievements and experience in past projects can prove valuable. I am available for an interview at your most convenient time and date. I can be reached anytime via my cellphone at +92-324-4208140 or via email at ali60351@gmail.com. Thank you for your consideration.

Sincerely,

Ali Nauman
