NS GROEP N.V.
UTRECHT, NETHERLANDS

Senior Lead Fullstack Developer (focus on Frontend) - Utrecht

Dear Hiring Team,

This letter is to express my interest in your posting for Job Application for Senior Lead Fullstack Developer (focus on Frontend). With the extensive experience that I have gathered while working as a Full Stack Developer for 6+ years I believe I can be a valuable asset to your company.

At Fashion Cloud B.V., I work as a development captain in the B2B Order team which is responsible for digitizing the process of restocking and pre-ordering clothing articles for retailers and allowing brands to promote themselves and their products. As a development captain, I am responsible for closely collaborating with product managers and designers, delegation of tasks, handling cross team communication, improving development experience by identifying and tackling pain points, handling technical debt, and helping my team to grow

Your listed requirements are a good match with my background and skills. A few that I would like to highlight are:

- 2+ years of Angular and 4 years of React experience
- Experience with NodeJS, Typescript, and AWS
- Experience working with product managers and designers
- Experience in leading a team of 4 developers
- A team player who encourages collaboration and communication

I've attached a copy of my resume detailing my experience. I would enjoy an opportunity to chat about your upcoming plans and discuss how I can be a good fit for the team. I am available for an interview at your most convenient time and date. Thank you for your consideration.

Sincerely,

Ali Nauman
