Summary

Currently a Full Stack Developer at Fashion Cloud which provides several B2B solutions to automate and digitize the ordering of garments. 6 years of total development experience specializing in the front-end development. Currently acting as a development captain responsible for gathering requirements from project manager, translating requirements to actionable tasks, supervising the implementation of said tasks during their development, handling cross team communication and helping my team to grow.

Work Experience

Fashion Cloud B.V.
Amsterdam, Netherlands

B2B ORDER - DEVELOPMENT CAPTAIN — *Jul. 2022 - Present*

- Regularly collaborate with product managers and designers to create solutions for the platform
- Plan implementation of solutions, create digestible tickets and handle their delegation
- Handle cross team communication to ensure no one is blocked
- Proactively identify problems in the platform and create RFCs to address them
- Give regular feedback and appraisals
- Provide support to my colleagues in their tasks
- Stack: Angular, TypeScript, LESS, Node (Express), MongoDB, AWS (S3, EventBridge)

Arbisoft
Lahore, Pakistan
